DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16 and 20-21, drawn to a method and articles of manufacture for order receiving, article providing, classified in class 705, subclass 26.
 - II. Claims 17-19, drawn to a method of presentation of a sales article and based upon that receiving an order from the user, classified in class 705, subclass 27.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination of conducting electronic commerce. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as providing presentations of sales articles to enable the user place an order, and invention I has a separate utility such as order receiving, analyzing the providing form and supplying articles. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter and also for the reasons that search required for Invention I is not required for Invention II, restriction for examination purposes as indicated is proper.
4. A telephone message was left for attorney Mr. James D. Halsey Jr. on April 29, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3625

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. **SPECIES**

This application contains claims directed to the following patentably distinct species of the claimed invention. ***In the event applicant elects Invention I above, he is further obligated to elect among the following species as follows:***

species of claims 4 for a sales article consisting of a packaged music recording medium;

species of claims 5; for a sales article consisting of a book; and

species of claims 9-12 for a sales article consisting of a packaged video recording medium.

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3 and 7-16 and 20-21 are generic.

8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

9. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3625

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

10. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yogesh C Garg whose telephone number is 703-306-0252. The examiner can normally be reached on M-F(8:30-4:00).
